

PORTABOOM® JIB POD

Versatile, interchangeable transport solution. Makes transporting, loading and unloading PORTABOOM® units easy, efficient and safe.

Features of the PORTABOOM® Electric Jib POD

- Electric remote-controlled winch enables quick and easy loading and unloading of the PORTABOOM® units.
- The remote control winch offers stop / start functionality allowing precision loading and unloading of the PORTABOOM® unit.
- The Jib POD is interchangeable. It can be installed on either the side or back of a vehicle, or on a trailer to suit your requirements.
- Customised transport solution that's versatile and suits the needs of any fleet requirements.
- Accommodates up to four (4) PORTABOOM® units.
- The Jib PODs electric winch is powered by a PORTABOOM® Unit.
- Economical, low cost solution.

The PORTABOOM® Electric Jib POD gives you the choice of transporting up to four PORTABOOM® units on either a vehicle or trailer depending on your needs.

PORTABOOM® Transport Solution

The PORTABOOM® Electric Jib POD is designed to be easily fitted to a standard 6 by 4 trailer or on a vehicle. This transport solution gives you the freedom to customise its use to suit your specific fleet and operational requirements.
