

PORTABOOM® MOUNTED TRAILER

All in one PORTABOOM® unit and transport solution. The PORTABOOM® unit is mounted onto the transport trailer. It's designed specifically to be towed into position and is operated while the PORTABOOM® unit remains fixed to the trailer.

Features of the PORTABOOM® Mounted Trailer

- The PORTABOOM® Mounted Trailer is a PORTABOOM® unit fixed to a custom-built trailer that is towed into position and doesn't require loading or unloading of the PORTABOOM® unit.
- Each trailer is individually registered and can be towed independently or as a tandem, as required.
- Universal tow bar.
- The quick release function makes it easy to detach the PORTABOOM® Mounted Trailer and fast to set up.
- Includes a storage container for easy transport of the boom arm.

The PORTABOOM® Mounted Trailer is the Ideal solution for long term, large civil construction projects.

PORTABOOM® Transport Solution

Two PORTABOOM® Mounted Trailers can be towed in tandem. They contain a quick release function making it easy to set up and operate without the need for loading and unloading the PORTABOOM® units from the trailer.
